2019-20	Zion Matriculation Higher Secondary School SSLC 82.6%

PROJECTS

- BIDION - NEXT.JS, TAILWIND, CSS, NODEJS, EXPRESS, ETHER.JS, SOCKET.IO(SERVER) - A decentralised Web3 auction platform on the Monad blockchain using Solidity, Ether.js, and Next.js, enabling transparent smart contract-based bidding, NFT minting, and automated transaction execution.Ensured real-time interactivity and secure, user experiences in a fully decentralised environment.
- FOOD TRACEABILITY APP - React, TypeScript, Vite - A Blockchain-Powered Food Traceability System ensures transparency, fairness, and security in food supply chains by leveraging Ethereum and smart contracts. It creates a tamper-proof, decentralized tracking system, preventing fraud, unauthorized diversions, and inefficiencies while fostering trust among all stakeholders.
- CINIFLICKS - – FLUTTER (DART),GOOGLE MAP GEOLOCATION API,MONGODB- A user-centric social networking app for filmmakers and technicians, streamlining crew discovery, hiring, and collaboration. Combines real-time job listings, profile management, and Google Maps integration for location-based professional networking within the film industry.
- BLOG APP - MERN Stack (MongoDB, Express, React, Node.js) – A full-stack blogging platform enabling users to create, update, delete, and interact with blog posts through likes and shares. The app supports real-time commenting via Socket.IO, user authentication, and profile sharing. Built for seamless user engagement and efficient content management, it emphasizes clean UI and optimized performance.
- PERSONAL PORTFOLIO - HTML, CSS, JavaScript – A responsive, interactive personal portfolio showcasing projects, skills, and experience. Designed to reflect professional identity and technical capabilities through smooth navigation, clean design, and intuitive UX. It serves as a digital resume and contact hub, tailored for recruiters and collaborators.
